FINAL ACTION

Response to Arguments

1. Applicant's arguments filed on 5/24/2002 have been fully considered but they are not persuasive. Applicant seems to ignore the stand-alone computer as indicated by Figure 2, with the independent removable medium including a CD-ROM of Teshima'470. In addition, as pointed out in the prior office action, there are a number of storage capabilities as listed under element 13 of Figure 2 and in which there are clearly enumerated.

2. The newly added claims would have been restricted out had they been originally presented because they require additional searching, and they are therefore restricted out by original presentation.

Election/Restrictions

3. Newly submitted claims 16-43 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The new claims introduce elements such as "proprietary" and "servers" which require additional searching in areas not previously searched.

4. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 16-43 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Teshima'470.

Teshima'470 teaches all the features of the instant invention including a stand-alone workstation connected to the imaging modalities (see Fig. 1, elements 1-4) and an independent removable medium (see Fig. 1, element 3 and 6), which includes a number of saving capabilities including CD-ROM (see Fig. 2, all the saving capabilities are listed under element 13). Furthermore, the invention includes the DICOM communication system (as indicated by Fig. 1 being connected between element 3 and element 2).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Callahan et al.'491 teach an ultrasound management image management system.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3737

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
